

Gearbox for electrical motors rig

8.3 MW, 42 200 Nm

- Used to test electrical motors connected on both gearbox sides
- Shafts mounted on hydrodynamic plain bearings
- Designed to cover 16MW for electrical short circuit test

Puissance

8 300 kW

Power

Vitesse d'entrée

3 700 rpm

Input Speed

Vitesse de sortie

1 878 rpm

Output Speed

Couple max

42 200 Nm

Maximum Torque

Poids

5 650 Kg

Weight

KR 4677
